

CONTOUR: excellence achieved together

Who are we?

Colleague business-owners sharing your passion

Running a business is your passion. You are not alone in that, as it is a passion we share with you. Our advisors know what drives you. They share your optimism, but also recognise the problems and doubts inherent to running a business, and offer solutions and sound advice. In short, our advisors think along your lines, critically. We are personally involved business colleagues. A business colleague who shows you the way, stimulates you, challenges you, and offers you a reflection on things. This is why you are in direct contact with a fixed team comprised of a partner, a relations manager, and fixed assistants. They know you and your company, are able to survey the business, draw connections and anticipate, all because they know what your plans for the future are. We are convinced that this kind of personal communication enhances the quality of our work. Quality is, after all, something you attain together.

Who do we serve?

At home among medium and small businesses

CONTOUR has a heart for the business-owners in medium and small businesses and the non-profit sector in the region of North- and Middle-Limburg and East-Brabant in the Netherlands. With that, we fulfill an important position for the top SME's. We know the kinds of questions that may be fired at you, and know the answers to them. Not only are we well versed in the latest laws and regulations, we also know how to apply them effectively thanks to our broad client base. This is a cost-efficient way of working, and on top of that it supplies you quickly with the answers to your questions. The team at CONTOUR is experienced in your market and sector. Negotiating with an investor or insurer might be a one-time thing for you, but for us it is a familiar activity. With good deliberation, we come to the best solution. This is why you can call upon us with practically anything you are worried about. Whether it is finding personnel, your purchases, business succession or your prices; at CONTOUR you will find trust and professional advice.

What do we do?

Quality advice from certified accountants and tax advisors

Figures. Preferably in the black. That is what most business owners expect of their accountant. You, however, expect more. You have a right to get more. You want figures with a good story, linked to solid advice. A yearly balance is needed, but preliminary figures benefit you more, ones that allow you already to adjust your strategic planning at the start of the year, if needed. We will give you these figures. We take the initiative here, and choose an approach aimed at the future. This not only demands going over the taxes, investments and financing on a yearly basis. We also consider thinking along your lines about, among other things, fiscal options, effectiveness, building up capital, the market, human resources and insurance aspects, to be part of our task. Medium and large enterprises are required to have their annual reports inspected by a certified accountant. For this purpose, the Wta, a Dutch law for the supervision of accounting organisations, demands that a proper quality policy is met. CONTOUR complies with these regulations and is in the possession of a so-called Wta permit. As such, our auditor reports meet all legal standards and are equal to those of larger offices.

Known fees and a yearly price agreement

You are critical about costs compared to revenue. You should be. This is why CONTOUR works effectively and with efficient overheads. But that alone is not enough. You don't want to run into surprises; therefore you will receive a clear, modular quote with a fixed price for all the work conducted on a yearly basis. This provides transparency, also when you have a need for a service or specialist advice not included in the regular tasks. In the following month, you will receive a clear invoice with an explanation. Meaning - no surprises.

Personal attention for the director-stakeholder

As previously mentioned, not only your business is in good hands at CONTOUR; your personal situation also receives full attention. As director-stakeholder, you can expect advice that suits you like a glove.

We will provide you with refreshing advice that will benefit both your company and you as shareholder. Additionally, we will find out how we can optimise your matrimonial regime, judge your will and determine, together with you, when money can be withdrawn from the company and how: in the form of a dividend or salary. A healthy business and proper timing when it comes to the conversion of company value to spendable income are constantly our starting points. When it comes to advice on personal advantage, we also look further than the borders of our country. Generating income in foreign countries or a properly prepared financial emigration are options that can benefit you considerably. Consistently based on your personal wishes.

LOONPUNT (SALARY POINT)

Your personnel is an important capital investment. You know who you need, and how to train and drive people. You undoubtedly also know the big administrative task of having personnel. Don't worry, the specialists of LOONPUNT will be more than happy to deal with it for you. They know everything about salary administration, your collective workers agreement, and other laws and regulations. This not only gives you a solid wage administration, but also a partner to ask all your questions. LOONPUNT works in teams, per sector. This works well and fast. But LOONPUNT does more. We offer assistance with questions about health insurance, contracts, cross-border employment, and we offer advice in the event of conflicts at the workplace. And you? You will be able to focus on what you are good at.

CONTOUR online

Making back-ups and storing them carefully, transcribing administrative data and adjusting it - it was necessary, but took a lot of time. Was, because the modern administration of a medium or small company is done on the Internet. Always accessible by you and us from anywhere, always up-to-date, and never more than one version. This allows you to make important, urgent decisions based on accurate, up-to-date information. Whether you are at the office, visiting a client, or abroad. You will have direct access to your entire administration, seven days a week, 24 hours a day. Data can be entered or modified at any time.

CONTOUR online is a subscription service: You will have a complete, safe, online administration for a fixed amount per month. Of course, you aren't alone in using it. We monitor actions, check the data, and correct this if necessary. If you want, we can completely take over your administration as a temporary solution, until you can make bookings yourself again. Taking care of the VAT declaration is simple through CONTOUR online.

Knowledge partner across borders

Doing business generally does not end at the border. Globalisation provides companies with an ever increasing playground. As a result, there is a growing demand for international consultancy. CONTOUR possesses that knowledge and cooperates with internationally operating partners. As such, we are a globally operating accountancy organisation and, for you, an international strategic cooperative partner. In this global network, all taxation and social-legal questions will be answered by our partner offices. You will be assisted by your trusted contact, who will clearly explain everything to you in your own language. Your business world expands with CONTOUR.

Euregiotax

Doing business often doesn't remain limited to The Netherlands. Whether you do business with other countries or employ personnel working cross-border, you will run into differences. Not only when it comes to culture, but also in laws and regulations, fiscally, legally, and related to social insurance. If doing business in and with another country offers you possibilities, it is essential to have guidance from a trustworthy and experienced partner. Euregiotax - part of CONTOUR - is such a partner. We know the laws and regulations every business-owner who crosses borders runs into. In collaboration with our international partners, we take care of quick and efficient solutions and give you personal advice. Borders are no longer an obstacle for your ambitions. After all, excellence is achieved together. For more information about Euregiotax, see www.euregiotax.de.

As you can see, CONTOUR offers the quality of a large office cut down to human proportions. By that, we are not saying anything excessive. Together with you, we strive for the best possible result. After all, quality is something you attain together.
